ERD AND MAPPING:

Erd:

Here,we show all Entities with their attributes in our project and the relationships between them.

Schema of Mapping:

Patient:

Patient_id	Name	Gender	Age	Phone	Email	Address	Password

Appointment:

Patient_id	Date	Time

Medical_history:

Patient_id	Complaint	Drugs	Chronic_disease	Genetic_disease

User:

User_name	Password

Here,we convert our ERD to tables in database management system and detect primary keys and foreign keys for each entity .
